

YOSHIMOTO ADVANCED MORPHOLOGY TRAINING

DYSLEXIA
ORTON-GILLINGHAM
INSTITUTE
AUSTRALIA

Kate Watt

Bachelor Primary Education

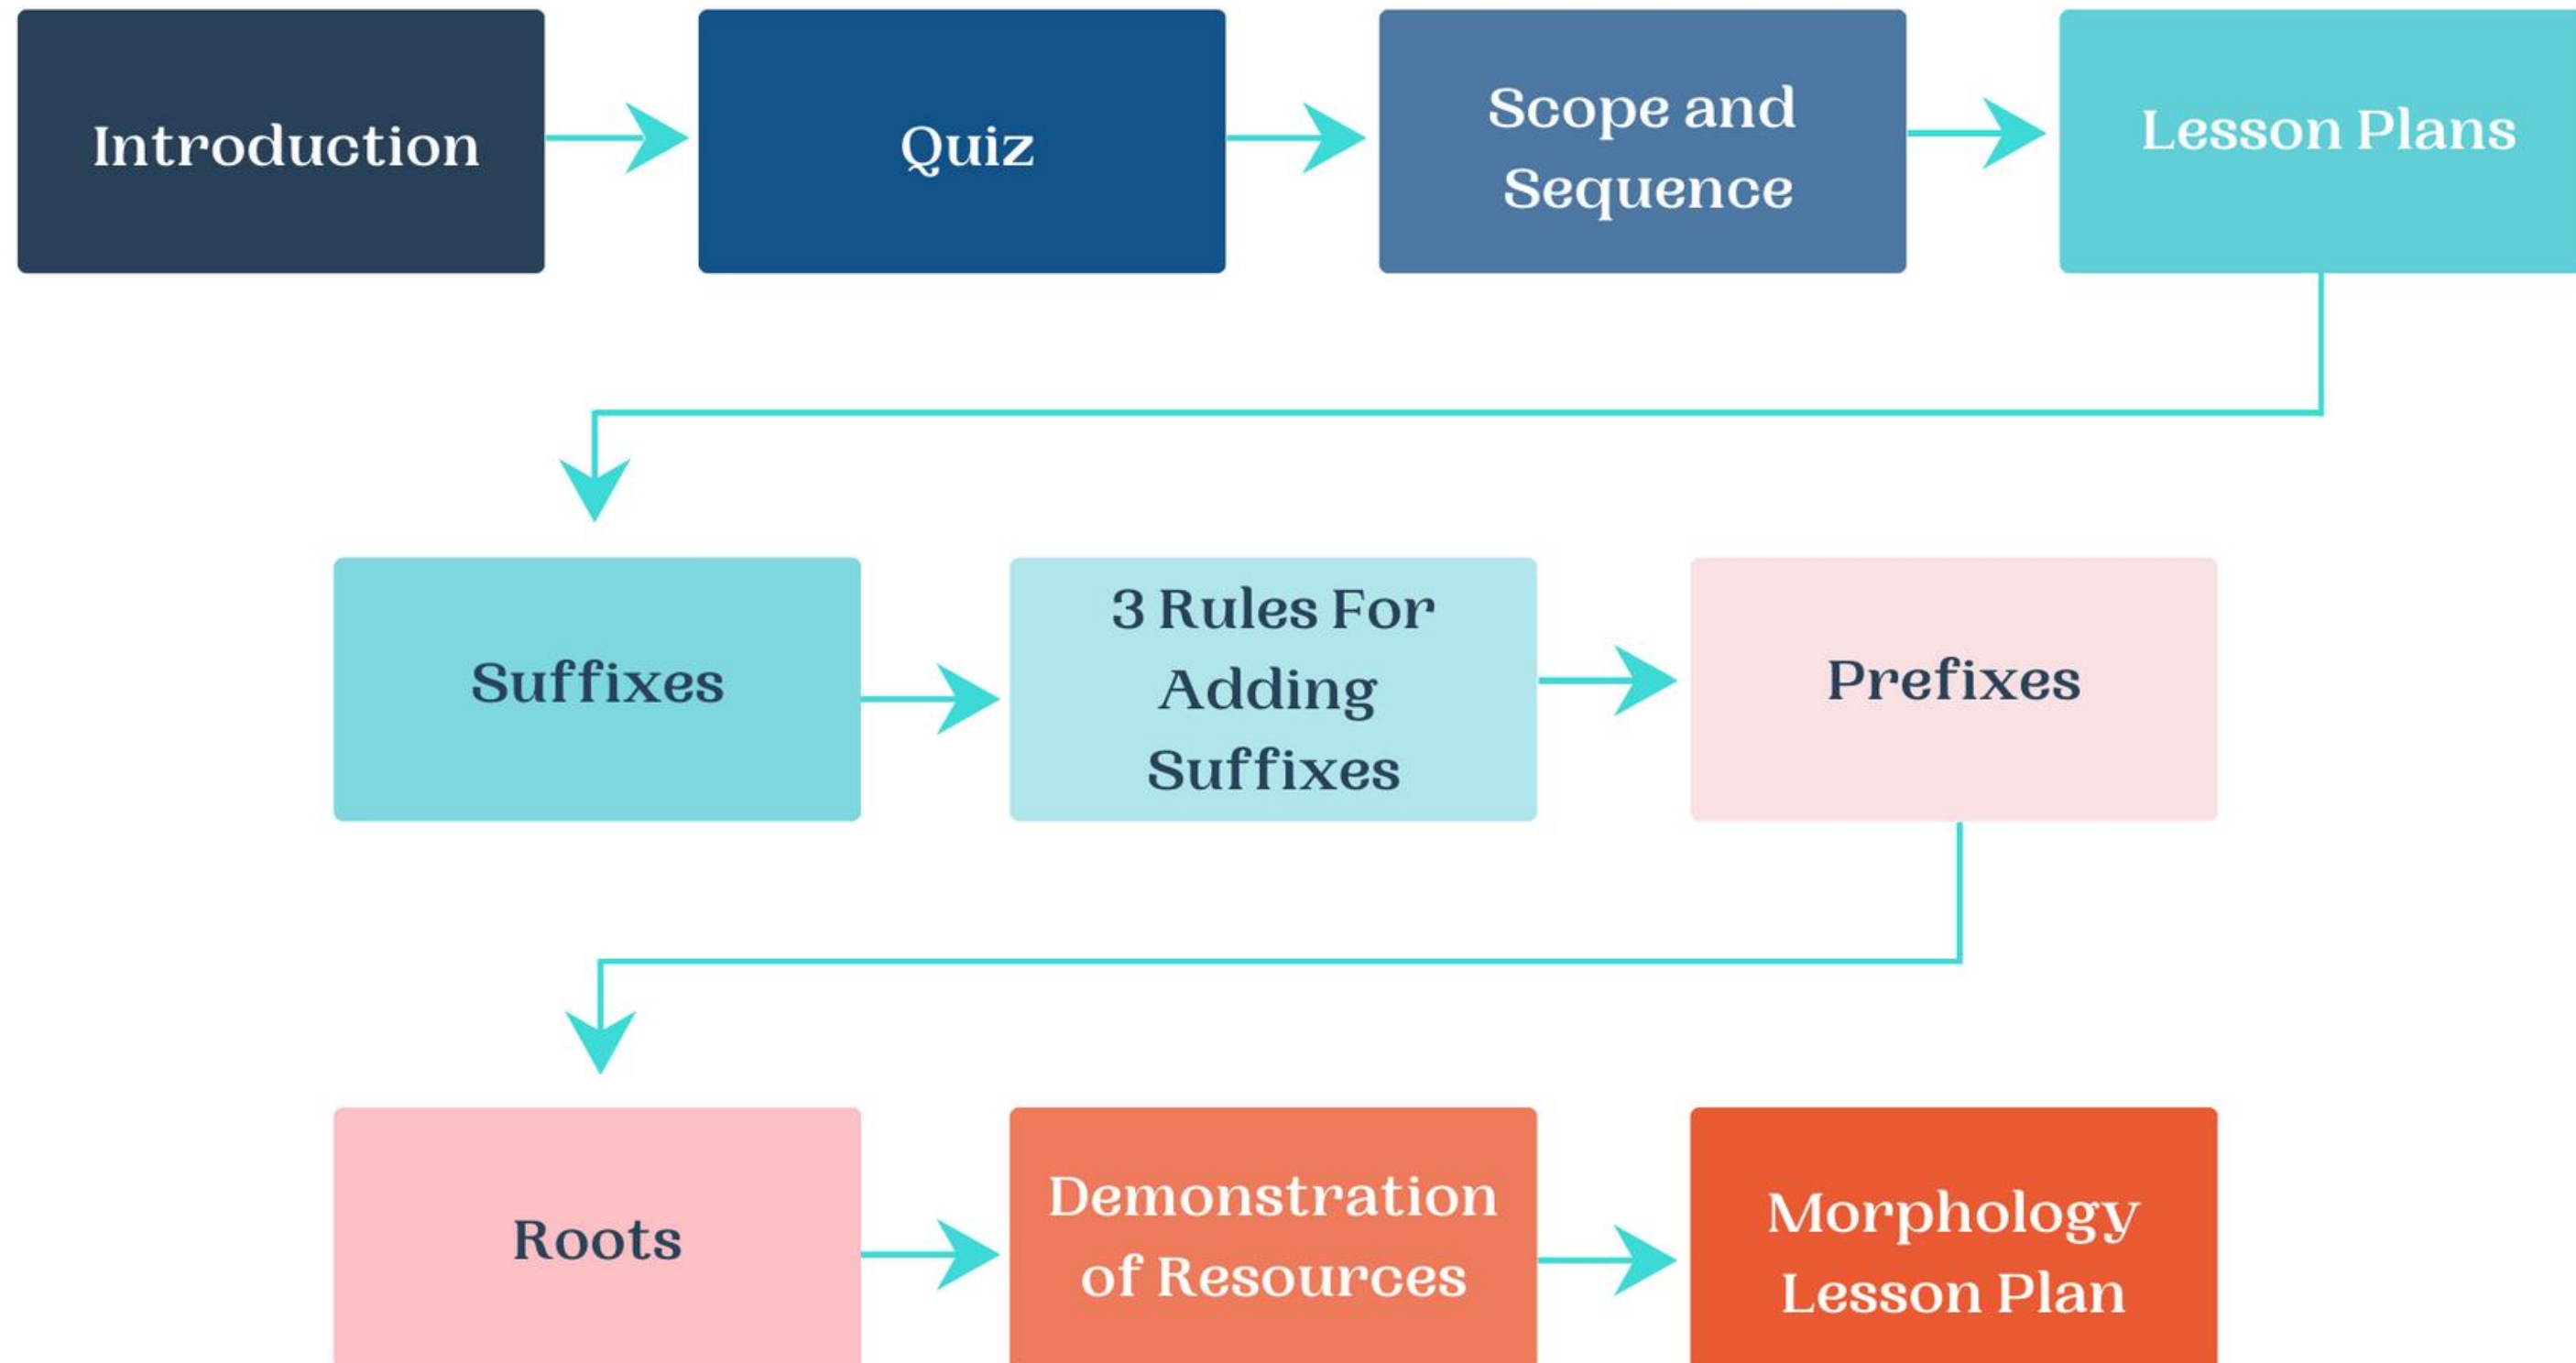

Certified Dyslexia, Reading and Orton-Gillingham Specialist.

Certified Master Trainer for Orton-Gillingham Basic and Advanced Morphology
for Australia (Orton-Gillingham International, Inc.).

Certified Master Trainer for Yoshimoto Multisensory Maths.

Agenda

Every Layer Has A Way Of Adding Words To The Language

Anglo Saxon

1

England was first settled by the Angles and Saxons from lower Germany. 26% of English words are Anglo Saxon. Words tend to be shorter/one syllable, red words and compound words.

eg: mother, love, dog, finger, were, coat.

Latin

2

Result of William the Conqueror invading and conquering England in 1066. Words tend to be longer and are more sophisticated. In Latin there is a root which supplies the main meaning and must have an affix attached.

eg: injection, exporting.

Greek

3

Words are structured from combining forms, each one equally as important as the other. Both parts needed to understand the meaning of the word. Words are mathematical, scientific, philosophical terms.

eg: biology, telescope.

Pre-test Answers

2. Morphology is the study of the smallest meaningful units in the English language. Morphemes are a word or part of a word that provides meaning. eg: love, -s, rupt, re-, elephant
3. Explicit instruction of morphemes and grammar helps students grow their vocabulary, their knowledge of words and improves reading comprehension. The study of morphemes also impacts spelling improvement.
4. Suffixes indicate part of speech (grammar).
5.

a) con = with or together	b) ex = out of, from
c) de = down, away, opposite of	d) in = in, into, not
e) re = back, again	f) trans = across, over, through

Pre-test Answers

6. A chameleon prefix can sound or be spelt differently depending on the the first letter of the root word. (eg: con, in, ex, sub)

eg: con = com (root begins with b,m,p) compress

col (root begins with l) collide

cor (root begins with r) correct

co (root begins with a vowel or h) cohesion

eg: ex = e - eject

7. a) port = bring, carry

b) fer = carry

c) tract = drag or pull

d) ject = throw

e) rupt = break

f) scope = see

8. Greek combining forms are predominantly found in science and maths subjects.

Scope and Sequence

- With morphology, there is more flexibility.
- Introduce 4 suffixes: -s -es -ed -ing
- Then teach 4 prefixes: re- un- mis- in-
- ‘Flip flop’ between introducing suffixes and prefixes until students have learnt 8-10 suffixes and 12+ prefixes
- After such, introduce the first root. Choose concrete roots such as ject, rupt, port, tract to support visual association.
- Continue introducing prefixes and suffixes whilst building upon lower level Latin roots

Scope and Sequence

- Upper Level Roots and Greek Combining Forms can be introduced earlier to support content areas of study.
- You do not need to teach all the lower Latin Roots before introducing Upper Latin Roots and then Greek Combining Forms.
 - carn/carni = meat/flesh carnivore
This will support learning and understanding about this area of study.
- What you choose to teach will prepare students for content areas they will encounter.
- Ensure students understand the difference between a base word and root.

Suffixes – Card Deck Review

- Suffixes come at the end of a word and indicate part of speech.

Teacher shows card and asks for meaning and part of speech. eg: - less, adjective

Ask students for a word and to explain what it means. eg: homeless = without a home.

Continue to ask other students for examples.

Repeat with other suffixes that have previously been taught.

If a student cannot provide a word, teacher supports by saying ‘without cheer’ so student can say ‘cheerless.’

Can ask students to place the word in a sentence.

Introduction of a new suffix

Teacher shows suffix and pronounces. eg: - ful

Teacher writes the suffix on the board and the students copy.

Teacher provides meaning (full of or having) and the students repeat.

Teacher writes the meaning on the board and the students copy.

Teacher states part of speech (adjective) and the students repeat.

Teacher writes the part of speech on the board and the students copy.

Students write the suffix 3 times as they say the suffix.

Students brainstorm words which the teacher writes on the board.

Students copy the words.

Select a keyword.

Students select one word to write a sentence.

This card is added to the review card deck.

Doubling Rule or 1-1-1 Rule

1. Determine if you have a 1-1-1 word = one syllable, one vowel and ending with one consonant.

1. Yes - then look at the suffix.

1. If it begins with a vowel, double the ending consonant and then add the suffix.

ship + ing = shipping

ship + ment = shipment

rain + ing = raining

Silent -e Rule

Does your base word end with a silent -e?

Yes - if your suffix begins with vowel, drop the 'e' and add the suffix.

rake[✓] + [✓]ing = raking

1. If the suffix begins with a consonant, just add it to the silent -e word.

late[✓] + ly = lately

Y to i Rule

Does your base word end with 'y'?

Is there a vowel before the 'y' in the base word? Yes - add the suffix

✓✓ say + ing = saying

Is there a vowel before the 'y' in the base word? No (there is a consonant) -change the 'y' to an 'i'

✓ cry + ed = cried

✓✓ cry + ing = [×]criing crying

Prefixes – Card Deck Review

- Prefixes come at the beginning of a word and can modify meaning.
 - Introduce closed prefixes first.
1. Teacher shows card and asks for meaning. Eg: un- not, without
 2. Ask students for a word and to explain what it means. untidy = not being tidy
 3. Continue to ask other students for examples.
 4. Repeat with other prefixes that have previously been taught.
 5. If a student cannot provide a word, teacher supports by saying ‘to build again’ so so student can say ‘rebuild.’
 6. Modified card drill = teacher shows card students say students say meaning

Latin Roots

- Approximately 55% of English words
- Prefixes and suffixes must be taught prior to introducing the first root.
- Ideally first root(s) should be introduced in Year 1.
- Choose concrete roots to begin with - ject, port, struct, tract
- The first time introducing a root is time consuming, however, it demonstrates to the students the process in building words and how many words can be built from one root with just the affixes they know.
- Following lessons - the teacher provides the prefixes and the suffixes for students to build words with the new root.
- Review card drill - same procedure as prefix and suffix decks

Introduction of a Latin Root – version 1

1. Teacher writes previously taught prefixes and suffixes on the board.
2. Teacher writes new root on the board and provides meaning.
3. Students build words by adding prefixes and/or suffixes. Discuss meaning
4. Select a keyword.
5. Students write a sentence which contains a new root word.

Introduction of a Latin Root – version 2

Prefixes come at the beginning of a word and can modify meaning.

Introduce closed prefixes first.

1. Teacher shows card and reads the root. Students repeat. Teacher writes on board and students copy onto their student sheet or workbook.
2. Teacher provides meaning and writes on board. Students copy.
3. Students write the root 3 times onto their worksheet.
4. Teacher asks for words containing the root and writes on the board for students to copy
5. Select a keyword.
6. Students write a sentence which contains a new root word.

Lesson Planning

- Card drill - sounds, prefixes, roots or suffixes. Select one.
- WTR - will now include sounds, syllabication and morphemes.
- WTR extension - questions must be more sophisticated.
- Auditory (spelling) - sound bank now includes sounds and morphemes.
eg: aw, igh, re-, un, port, -est, pre-
- Auditory - spelling now needs to be more complex/higher level.
eg: predawn - only aw and pre- in the sound bank.
- Introduction of new: select one - sound, prefix, root or suffix
- Dictation - must prioritise what was introduced in this lesson and can also include anything previously taught.
