

Australian Vowels Word List

- Any words in red teach as learned words, in groups, as they follow the same pattern (but not enough to
- consider teaching as a new phonogram).
- For the others, make a new phonogram card (or add the second / third sound to a current card e.g. a, ou)
- Work out when you want to teach in the scope and sequence, and teach in exactly the same way
 - Introduce phonogram, key word, decode/encode, dictation, review.
 - Don't do any comparisons with other similar sounds for a few weeks. Review and embed in orthographic memory as a single phonogram first.
 - Then you can try eer/ear, ar/a, are/air, or/ore, u/ou etc. Always use key words to support spelling.
- ear as /ir/ (earth) is not included as that is already in Ron's scope and sequence.

A great resource is Alison Clarke's Spelfabet spelling lists by sound (on her website). If there are fewer than 10 words with that phonogram, teach as a learned word.
