DEFINITIONS		
Phoneme	A phoneme is the smallest unit of meaningful sound in speech. We teach letters to match the phonemes, for example 'hat' has 3 phonemes h-a-t. There are 44 phonemes in English, each one representing a different sound a person can make.	
Grapheme	A grapheme is a letter or group of letters that represent the sounds in speech. For example 'a' as in strap or 'tch' as in ditch.	
Morpheme/ Morphograph	A morpheme is the smallest unit of meaning (such as a prefix, suffix, or root word). It may or may not stand alone (unlike a word which is freestanding). Ejected has three units of meaning.	
Open syllable Link	The vowel is left open at the end of the syllable so it is able to say its long sound (name), as it isn't 'trapped' in by a consonant eg: no, ro, me	
Closed Syllable Link	The short vowel is trapped in the middle of the word so the vowel can only say its short sound eg: not, rat, wom	
Magic e syllable Link	The silent e at the end of the syllable makes the vowel before the consonant say its long sound (name) eg: home, kite	
Silent e syllable	The e at the end of the word is silent but is used to prevent some plurals and are used to make the g say the 'j' sound. E.G - horse (without the e it is 'hors') or budge (the e makes the g say the /j/ sound).	
Digraph	A digraph is two letters that go together to make a new sound. When taught, we say the letter names, then the sound eg: s_h says 'sh' (sh, ch, th, ng, ck, ph, wh, kn (at the beginning of words), gn (never in the middle of a word)	
Trigraph	A trigraph is three letters that go together to make a new sound eg: dge, tch (not a vowel sound)	
Blends	(Also called consonant clusters) Blends are groups of 2 or 3 letters in words that appear at the beginning (initial) or end (final) of words. You can hear the sound of each letter eg; string s_t_r, frog f_r, bank n_k, send n_d	
Vowels	Vowels are a speech sound made by the following letters: a, e, i, o, u. Each vowel has more than one sound and can be silent with no sound at all. NB: 'Y' is sometimes classed as the sixth vowel as it can make some of those sounds eg: 'i' 'e'	
Vowel Teams (two or more vowels come together to make a vowel sound) - Some make a new sound (oi, oo, etc.)	ai Link	a_i says /a/ in the middle (or start as in aim) of a word - rain
	ay Link	a_y says /a/ at the end of a word - play
	ee Link	Key word – feet/sheet (in the middle of a word)
	ea Link	Key words - Eat bread (at the beginning or in the middle of a word)

	igh Link	Key word – light (usually followed by t)
	ie Link	Key words – Pie piece ie = /i/ at the end of short words. le = /e/ in the middle of words.
	oa Link	Key word – boat (in the middle of a word.)
	ow Link	Key words – slow cow ow = /o/ (at the end of a word, or when followed by a single l or n) cow (at the end of a word or when followed by a single l or n, or when followed by el or er
	ou Link	Key word – out (at the beginning or in the middle of a word)
	y as a vowel	Y says /i/ at the end of 1 syllable words (by) Link Y says /i/ gym Link Y says /e/ at the end of 2 or more syllable words (Penny rule Link)
	ew Link	Key words – few screw few = /u/ (at the end of words) screw = /oo/ (at the end of words)
	ue Link	Key words – blue cue cue = /u/ (at the end of words) blue = /oo/ (at the end of words)
	oi Link oy Link	o_i says /oi/ in the middle (or start as in oil) of a word. Key Word - coin oy says /oi/ at the end of a word. Key Word - boy
	oo Link	Key words: Moon Book - both sounds used in the middle of a word
Floss Rule Link	In a one syllable word with a short vowel, double the final f, l, s or z (cuff, fell, grass, buzz)	
Long spelling after short vowel	ck Link	Use 'ck' at the end of a short word after a short vowel eg: sick, clock
	tch Link	Use 'tch' at the end of a short word after a short vowel eg: match, ditch It is spelt /ch/ after a long vowel or a consonant eg: beach, teach, lunch
	dge Link	At the end of a short word after a short vowel the sound /j/ is spelt –dge. ridge, badge. The /j/ is spelt -ge at the end of a word after a long vowel or a consonant eg; cage, lunge
Gentle Cindy	Link g = /g/ when followed by a, o, u, and consonants – goat, glad ----- g = /j/ before an e, i or y eg: gentle, ginger gym. Link c = /k/ when followed by a, o, u and consonants – cat, clam ----- c /s/ before an e, l or y eg: Center city had a cyclone. (we use the letter k to make /k/ before e, l, y)	
Controlled r syllable Link	'er' Key word - fern 'ir' Key word - bird 'ur' Key word – church 'or' Key word - corn 'ar' Key word - car	
Consonant + le	Link	

	Link
Rabbit Rule	Link
Tulip Rule	Link
Camel Rule	Link
Lion/Violin Rule	Link
Silent e + suffix Link	When adding a suffix beginning with a vowel to a word ending in an e, drop the e. Eg: shine – shining, nice – nicest Remember the doesn't completely go away because the word is still read as if the e is there.
Y to I rule Link	When a word ends in consonant and y, and the next morphograph begins with anything other than an i, change the y to an i. If the next morphograph begins with an i, keep the y. (-ing, -ish, -ist). If the word ends vowel y, keep the y. Examples: cry, cried, crying; copy, copies, copying; and play, play; playing.
Kind Old Words Link	Some common words ending in ld , st , nd , and lt have a single vowel with a long vowel sound. Eg: find, most, wild, bolt
1-1-1 Rule Link	1 syllable words, ending in 1 consonant after 1 vowel – double the final consonant before adding a vowel suffix eg: skip - skipping
Syllable	A syllable is a beat in a word. Every syllable has at least one vowel sound. Eg: ro / bot Multi-syllabic are words with more than one syllable. Eg: habitat, caravan
Decode (read)	Breaking a word into phonemes (sounds) and reading (to make meaning). Moving from symbol to sound.
Encode (spell)	Using phonemes (sounds) to spell up words. Moving from sound to symbol.
Isolate	To identify sounds in words.
Manipulate	To change sounds in words.
Segment	To separate sounds in words.
Learned Words	Words that are not completely phonetic. Show parts of the words that are phonetic and identify the irregular part. (the – th is regular, the e is irregular) Circle the  regular part of the word and underline the irregular part.
Regular words (decodable)	Words that can be sounded out and follow the alphabetic principle eg: sat, bit
High frequency words	Words that are commonly used. They may or may not be regular words.
Phonological awareness	Phonological awareness is the umbrella term used to describe the overall awareness of how words and syllables can be divided into smaller units. It involves; syllables – blending and segmenting Phonemes – blending and segmenting (phonemic awareness – see below)
Phonemic awareness	The ability to hear (perceive), isolate and manipulate speech sounds (phonemes) within spoken words.
Schwa	A weak, unstressed vowel. Eg: <u>a</u> – mazing, teach – <u>er</u>
Mnemonics	A system such as a pattern of letters, ideas, or associations which assists in remembering something. Eg: 'Oh U Lucky Duck' - 'ould' as in would.

Alliteration	A series of words in a row / sentence that have the same first sound. Eg Monkeys munch magnificent muffins. Even elephants enjoy eating eggs every evening.
Homophones	A word that sounds like another word but has different spelling and meaning. - There, their, doe, dough
Homonyms Link	Words that sound / spell the same different meanings. - pen (used for writing) or pen (as in I will 'pen' a letter), bark (tree) bark (dog noise)
Homograph	Words that are spelled the same but sound different and have different meaning. - Tear (as in rip) and Tear (as in to cry)
Synonyms	Words that have the same (or nearly the same) meaning. Big, large, huge
Antonyms	Words that have the opposite meaning to another. Big -> small
Compound words	Two or more words joined together to make a new word. Link
