

Glowing “ow” Words

Orton-Gillingham Concept: “ow”

Science: Chemistry

Materials:

1. Elmer’s Glue
2. Phosphorescent Zinc Sulfide
3. Q-tips or hard bristled paintbrushes

Directions:

1. Mix Elmer’s glue and the phosphorescent zinc sulfide
2. Dilute with a little water
3. Students are given construction paper (colored)
4. Teacher dictates “ow” words. Student dip the Q-tip or brush into the mixture and write the words (sounding as they write).

flow glow blow slow grow throw low

5. The words will glow in the dark. The teacher can also use black light for greater effect.
