ph Analogies

An **analogy** is two sets of words that you read as if they were a sentence. These sets of words are all related in a special way. Read the first pair of words and determine its relationship. Read the given word in the second set. Write a word in the blank space that will have the same type of relationship to the given word.

see : eye :: hear : _____ (see is to eye as hear is to _____)

The first set of words says that you see with your eyes; then, the correct word for "hear" is ear in the second set. The relationship for both sets is that of "function."

DIRECTIONS

Read the first pair of words and determine its relationship. Fill in the blanks with the following words to complete the analogy.

phrase	dolphin	phantom	phonograph
autobiography	graphite	sulphur	physician
	phonogram	sphinx	

lake : trout :: ocean : _____ (location)
