

Magic-e Cards

The goal for this activity is to provide practice for students to decode short vowel and vowel-consonant-e words. The children should be able to automatically make the shift from the long vowel and short vowel words.

Xerox the following sheets on card stock. Cut the words out and fold along the dotted line.

Show the child the short vowel word (with the “e” folded back) and then flip back the “e” and have the child pronounce the new word.
