Doubling or 1-1-1 Rule (Part 2): For words of two or more syllables, you will double the final consonant of the base word when adding a suffix beginning with a vowel IF the last syllable ends with a single consonant with one vowel before it and IF the accent falls on the last syllable. Of note, accents do not normally fall on prefixes and in two syllable words, the accent usually falls on the first. Also, if the last syllable is "mit," it almost always gets the accent.

Final Consonant Doubled

-ing, -ed	-al	-er	-able	-ance	-ence, -ent	-en

Doubling Rule: Part II

The Doubling Rule also applies to words with two or more syllables (the last syllable must have one vowel and it must end with one consonant) provided that the last syllable has the accent. Generally, the accent falls on the first syllable of two-syllable words. Also, the accent usually falls on the root (not on the prefix or suffix).

pro pel' + -ing = propelling

trav' el + -ing = traveling

Directions: Place the accent on the correct syllable, then add the suffix to the base word.

e quip + -ed = _____

com mit + -ing = _____

sub mit + -ed = _____

la bel + -ing = _____

o pen + -er = _____

blos som + -ing = _____

vis it + -or = _____
