

TIC-TAC-TOE: Crazy or Continent Words

x	x	x	x

The following page represents two separate games (the teacher xeroxes enough copies and divides each into two separate "boards"). The teacher gives a practice "board" to each student or group. They look for the meanings (dictionary or Franklin Speller) and write it on the lines (they also practice pronouncing the words). A "clean" copy is then used to play the game. Each student or group picks "x" or "o." They then select a word, pronounce it, and give its meaning (they can refer to their practice sheets). If correct, they can place their letter in a strategic location. The next student or group will follow the same procedures. The winner is the student or group who has four consecutive x's or o's (diagonally, horizontally, or vertically).

dif fi cult _____	con fi dent _____	al ti tude _____	cul ti vate _____
ter mi nate _____	quan ti ty _____	mul ti tude _____	fab ri cate _____
ven ti late _____	op ti mist _____	ver ti cal _____	sup pli cate _____
